## Agenda

**23 Sep 2021**

**10:00**

Workshop: Wound Care

Pam White of L&R

**11:30**

Workshop: Combining the art and science of compression to treat and manage a severe Lipo-Lymphoedema case

When the challenge of shape, size and severe fluid volumes collide with limited Service hours, a lateral thinking approach is essential for successful management

Rob Heath of Essity

**14:30**

Workshop: Low Level Laser Therapy

Ann Angel of Riancorp

**15:30**

Workshop: Effective solutions for complicated needs

Is it just a matter of size? Understanding compression and obesity.

Jobskin warmly invites you to join us for a virtual workshop directed at therapists wishing to extend their skills and ideas around garment prescription, fitting and troubleshooting compression in the context of obesity.

The increasing incidence of obesity generally, but specifically with lymphoedema, means complex and unique presentations for therapists seeking to prescribe compression garments.

This virtual workshop will review the underpinning principles that govern prescription for those outside the norm, and will incorporate measuring for garments, case studies and discussion around some of the challenges associated with comorbidities, skin folds, morbid obesity and unusual proportions. The virtual workshop will be followed by a live Q&A session.

Veronica Eichmann of Jobskin

### **16:30**

#### **Workshop: Introduction To Compression Pumps For Health Professionals**

Compression pumps are becoming more popular for the management of chronic and acute swelling. This session will guide participants through the basics of compression pump features, how they work, and safe use.

This education session will also cover the medical conditions commonly treated with compression pumps and discuss selection between products as well as examining case studies and pump application.

#### Key learning objectives:

- Learn about Sequential Intermittent Pneumatic Compression (SIPC) from the basic device features, indications, contraindications to treatment parameters.
- Learn about assessment for determining clinical effect of SIPC and clinical reasoning for setting and progression of treatment parameters.

Sarah Shellard of Medi-Rent

## **24 Sep 2021**

### **08:30**

Welcome and Housekeeping

09:00

Maximizing care of your patient with lipoedema

Karen Herbst

### **10:00**

Morning tea, coffee & trade exhibition

10:30

Getting the best outcomes - targeting and sequencing your treatments based on quality information and evidence

Prof Neil Piller,  
Lymphologist

### **11:20**

Breakout Rooms

11:35

Attendees Panel

Bringing together what was discussed in each breakout rooms, also a chance to bring up any discussion points regarding Lymphoedema from the attendees.

Everyone

**12:00**

Lunch break / trade exhibition / take a walk

13:00

Self-Care for Lymphoedema Management in Resource-Poor settings

Jan Douglass,

Lymphoedema Researcher

**13:45**

Working with a Charity to setting up a Bioimpedence Screening Programme

Kate McNabb

**14:15**

Structure discussion and vote

15:00

Breakout Rooms

15:10

Scheduled trade meetings

16:30

End of Day 1

**25 Sep 2021**

**08:30**

Surgical techniques, surgeon's perspectives of LO

Mr Grant Broadhurst,

Surgeon

**09:00**

The Role of Procedural Phlebology in the Phlebolymphoedema Spectrum

Dr Paul Weaver,

Phlebologist

**09:30**

Case Study

Anne O'Callaghan

**10:00**

Morning tea, coffee & trade exhibition

10:35

Lymphoedema Case Study/Weight management

Jonie Girouard

**11:10**

Breakout Rooms

11:25

Lymphatics research

Jonathan Astin

**11:40**

Vodder Therapists Get together

Diane Lacey

**11:55**

Lunch and trade exhibition/Take a walk

13:00

Scheduled trade meetings

**13:45**

Equity Committee /ALERT programme

Yvonne Ferguson

**14:10**

Working to educate the patients

Lymph Info Trust

**14:35**

Introducing the next Hui venue and Closing

**15:00**

Scheduled trade meetings

**16:30**

End of Conference
